SUMMARY

Transitioning from a senior project engineer role in the construction industry to a career in software development. Driven by an interest in coding and software, I completed a software engineering fellowship and I am now pursuing a Master's in Computer Science. With four years of construction experience, I bring a strong foundation in problem-solving, team collaboration, and project execution that I am eager to apply to software development.

EDUCATION

University of Southern California — MS, Computer Science (Scientists and Engineers) Feb 2025 - Present

California Polytechnic State University — BS, Construction Management Sep 2015 - Jun 2019

TECHNICAL SKILLS

Python | JavaScript | Java | C/C++ | Node | Express | React | Radix | Git | VS Code

PROFESSIONAL EXPERIENCE

Bernards Builders, Los Angeles, CA

Senior Project Engineer

Nov 2021 - Aug 2023

- Initiated coordination between design and construction teams to deliver structural and finish elements for a \$120M construction project through targeted meetings, job site walks, and formal records of contract questions
- Communicated status and potential obstacles of 8 respective subcontractors to owner representatives during weekly stakeholder meetings
- Maintained a remaining work list for 300+ apartment units by identifying issues with owner representatives and assigning work to subcontractors to facilitate project completion

Project Engineer

Jul 2019 - Nov 2021

- Resolved design conflicts and unexpected site conditions by evaluating contractual requirements and physical work in the field to provide solutions for design team approval
- Managed an assigned intern by directing work assignments, providing mentorship on the construction process, and conducting periodic performance reviews

Herrero Builders, San Francisco, CA

Project Engineer Intern

Jul 2018 - Sep 2018

- Authored formal information requests to architect by collaborating with construction team to resolve conflicts on a \$12M construction project
- Created progress records for a 30,000 sq. ft. building by documenting stages of completion of every room, determining when appropriate to report damage or issues
- Supported the estimating team on a bid for a 12,600 sq. ft. renovation by analyzing historic square footage estimates and performing quantity takeoffs

Project Engineer Intern

Jun 2017 - Aug 2017

- Assisted project engineer with tracking remaining work for a 122,700 sq. ft. building by organizing outstanding items and monitoring work process daily
- Arranged city inspections requested by subcontractors, communicating scheduled inspections to project team
- Documented issues blocking final occupancy by independently walking with owner's representatives to advance the project towards completion

PROJECTS

Event Search (2025) | [\[Website\]](#)

- React and Node/Express search app using MongoDB to save favorite events and hosted on Google Cloud

TotalView (2023) | [\[GitHub\]](#)

- Python and Flask productivity app utilizing the FullCalendar API and storing user data with PostgreSQL

VOLUNTEER EXPERIENCE

Hack for LA — Civic Tech Organization

Jun 2024 - Aug 2024

- Implemented updates to a live website by contributing to an open-source repository
